

What if one control system could...

- 1 Wirelessly operate all types of shading systems for example:
- external venetian blinds
 - internal roller blinds
 - louvres
 - awnings etc.

- Easily be pre-programmed to ensure:
- energy savings
 - heat gain reduction
 - solar glare control
 - personal preferences.

- 3 Enable control integration with other existing motorised systems such as:
- lighting ✓
 - security ✓
 - home entertainment. ✓

Remotely access control system from your favourite device even when you are overseas.
