

Horiso Climate Ready® Building Control Systems.

Wireless for new

EZ1

Hardwired for not so new

EB2

horiso®

engineering@horiso.com.au • horiso.com.au

Building control made simple.

Integration with audio visual, air conditioning and lighting.

Integration with energy saving management software.

Network with all building management systems.

One controller operates **up to** four motors.

Occupant **comfort** level optimised.

Upgradable without replacement.

Controls **all** motorised systems.

Minimum wiring requirements.

Personal preference **options**.

Installation cost **savings**.

Wireless connectivity.

Easy to maintain.

Remote access.

BIG ON SOLUTIONS

Horiso believe in submitting the right solar control solution to achieve our clients required outcomes whether it be high energy savings and or optimum comfort levels for occupants.

Our commitment to better solutions involves continually investing in development of new ideas from software innovation to hardware design implementation.

The engineering team at Horiso continually succeed in all aspects of solar control system implementation. Horiso will design and manufacture components to provide installation solutions into highly complicated facade design.

Solutions are always achieved from clients' diverse range of ideas and presented by Horiso from an analytical perspective. Email Neil Krotzsch to arrange an appointment before your next project commences.

engineering@horiso.com.au

BIG ON DELIVERY

In just over twenty years Horiso has manufactured over 35,000 shading systems and designed, installed and commissioned over 20,000 control systems for small, medium and large projects across Australia and other projects worldwide.

Our commitment to delivery involves collaborating on ideas to ensure project specific outcomes are successfully fulfilled.

Close communication with onsite managers, Horiso ensures a hands on approach in delivering a quality solution on time and on budget, no matter the project size.

Email Greg Petterson to arrange an appointment before your next project commences. info@horiso.com.au

BIG ON SERVICE

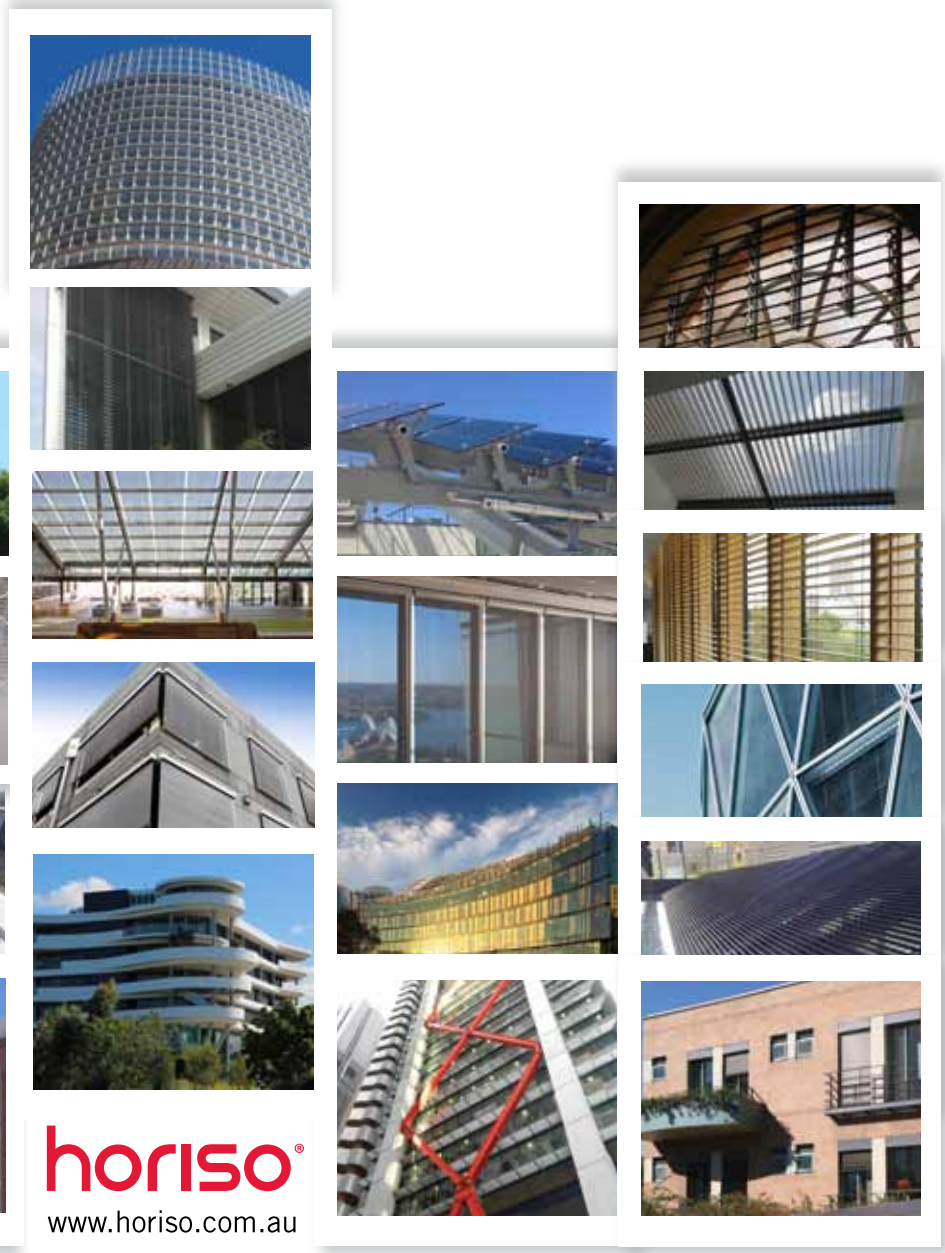

Horiso engineering team provide a comprehensive "Building Life cycle" service.

During a building's construction the electrical requirements for Horiso's Climate Ready® Control Systems are installed for the motorised systems. Commissioning of the control systems follows ensuring the correct operation of each system on each floor in accordance with the clients or tenants instructions.

An on going quality control service contract is provided to enable amendments, updates and or maintenance procedures to be fulfilled efficiently and without inconvenient disruption to tenants. This process is applicable for the building's existence.

Email Neil Krotzsch to arrange an appointment before your next project commences.
